

# HERTSWOOD Airies

## Air plant (Tillandsia) Care Instructions...

- Let me live in your home, I don't want to be outdoors.
- Mist me weekly or dunk me in water every couple of weeks.  
(Please don't over-water me)
- If my leaves curl up or look dry I need more water.
- Make sure me and my string are completely dry before putting me back in my pot.
- Tap water is fine but I prefer rainwater.
- I like indirect sunlight and good air circulation.
- Hang me by my string or stand me on my base, it's up to you.
- My pot is handmade in Tring from local, ethically sourced wood.
- I like a humid location with natural light, if you keep me in the bathroom please make sure me and my pot aren't constantly soaked.
